

CONSTRUCTION SERVICES

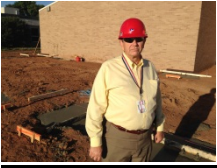

MISD Construction Services serves as a part of the Division of Operations and assists the Chief Operations Officer to implement and facilitate the needs of the district related to bond construction, new and existing building renovations, and implementation of all facets of construction related projects.

The following are areas of responsibilities of Construction Services: Development of construction time & base lines, schedules, review and approval of architectural, engineering and contractor drawings, submittals, and payment invoicing.

As part of the deferred maintenance portion of the bond project Construction Services develops, receives and oversees the completion of project bids through interaction with the successful contractor and MISD owner's representatives.

In effort to document present and future projects Construction Services reviews all plans and documentation for posting to "Submittal Exchange" and to the districts database for "Best Practices" for construction.

Construction Services:

Charles L. "Vaughny" Taylor
