

Top 10 Things To Do
To Prepare for
Face-to-Face Learning

1.

Become familiar with our morning drop off procedures . Explain that they will have their temperature taken before they get out of the car. This will help you and your student have a smooth start to his or her day.

2.

Google Form

			
Car Rider	Day Care Bus	Walker	Right at School
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Let your child's teacher know how they will be going home using our [Google Form](#). Students must be picked by 3:30. Have a back-up plan for what to do in case you are late.

3.

Check out our school [dismissal procedure](#). Look for a communication from your teacher about picking up the placard.

4.

Check with your child before school. If your child has symptoms of illness or a temperature of 100.4 or higher, your child should not come to school that day.

5.

Make sure your child is prepared with school supplies.

6.

Help your child form habits of social distancing, hand washing, coughing into their elbow, and wearing a mask. Note that we require masks for 3rd – 6th grade students and encourage them for younger students as well.

7.

Remind children about the positives of in-person learning– that they will be able to see their friends and teachers while continuing to learn new things.

8.

Help your child understand that some school expectations may seem strange, but we just want to keep them safe and well. Following are a few examples that you may want to note/discuss.

- When getting a drink of water, instead of using the water fountains at school, students will bring water bottles from home.

- When we go outside for recess, instead of using our playground equipment and hanging out with kids from other classrooms, we will play in open areas with kids from the same class.

- When eating lunch, instead of going through the cafeteria line and sitting near our friends, we will get our food from a cart and skip seats in the cafeteria.

- When working in our classrooms, instead of working in groups and sharing materials, we will work at a reasonable distance from others and we will not share materials.

9.

Plan to keep your child engaged with Google Classroom. Teachers will continue using Google Classroom for both at-home and in-school learning. Students should bring their Chromebooks to school every day like they would their other school supplies. They can safely carry their Chromebooks in their backpacks.

10.

Your child will likely pick up on the emotional cues from the adults in their lives. It is important that adults manage their own emotions well and remain calm. It is helpful when parents and teachers listen to children's concerns.

Welcome
